### 1. Remarks.

In an effort to expedite prosecution, and without prejudice or disclaimer to their underlying subject matter, applicant files this Continued Prosecution Application of prior application number 07/832,335, filed February 7, 1992, and withdraws the prior application from appeal before the Board of Patent Appeals and Interferences as of the filing date granted to this CPA.

Applicant notes that the Examiner has allowed, over the Olivo reference, the claims of U.S. patent 5,696,869, which is a division of the parent application of this CPA. Further, other divisions of the parent application have issued as U.S. patents 5,717,814 and 5,724,472.

Applicant also brings to the attention of the Examiner U.S. patents 5,434,678, 5,589,945, 5,664,046 and 5,634,849, issued to applicant.

It is respectfully submitted that there is patentable subject matter disclosed in the instant application, and that responsive to the Examiner's Answer, mailed March 20, 1998, in the parent case, the claims have been redrafted to better recite patentable subject matter that explicitly defines over the applied art. It is respectfully requested that this preliminary amendment be examined, and all the references that have been provided be reviewed, prior to any Action on the merits of the application. Allowance of the claims is earnestly solicited.

Respectfully submitted,
